Button osteophyte
Osteoarthrosis
Patella Teeth
Degenerative enthesopathy
Curtain osteophyte
Osteoarthritis
Ground glass
Fibrous dysplasia
Anteater sign
Calcaneonavicular coalition
Continuous C sign
Talocalcaneal coalition

*Syntarsus* (sin-TAR-sus) was a Late Triassic theropod. It got its name, which means "fused ankle," because some of its ankle bones had grown together. Only two feet tall, *Syntarsus* had to avoid being eaten by larger theropods while it searched for smaller prey.
Bayonet deformity
Clavicle fracture
Button Osteophyte
Osteoarthrosis
Salt and Pepper skull

Hyperparathyroidism
Die punch fracture
Lunate into radius
Paintbrush metaphysis
Rickets
Bell Clapper
Muscle tear in hematoma
